

## About Me

I am a Front-End developer. I have been part of various development teams, where I have always contributed value not only to the final product but also to the team, by bringing improvements in work efficiency and tools that enrich the development experience.

## Frontend Developer

## Experience

(Last Two)

### IEM Data - Front End Developer

Contractor

06/2023 - Present

Worked on multiple projects, including creating websites for clients from scratch using React.js + TypeScript as the main technology tool. Additionally, made significant contributions to improve and expand existing websites.

#### Achievements in the role:

- Led the complete development of multiple websites, working closely with the backend team to ensure seamless integration between the user interface and server logic.
- Implemented user interfaces with React.js, focusing on user experience (UX) to deliver intuitive and attractive interfaces.
- Designed and applied the project architecture following Clean Architecture principles, allowing clear separation of responsibilities and component reusability across different layers of the system.
- Resolved bugs and technical issues to ensure stability and performance of the final product.
- Actively collaborated in the implementation of version control and continuous deployment practices, enabling frequent and reliable product deliveries to clients.

### SocialMedia1989- FullStack Developer

01/2023 - Present

Contractor

In charge of the comprehensive development of the main website and e-learning platform. Additionally, responsible for creating and integrating various APIs, as well as developing and implementing SDKs to enhance the platform's functionality. Successfully designed and built websites for external clients, and took on the responsibility of auditing third-party websites to ensure optimal performance and bug fixing.
